

Announcement: Effective January 1, 2011

Temecula, California based TST Water, LLC, a leading US Manufacturer of water filtration products, is pleased to announce the acquisition of **Payne Industries**, LLC, one of the oldest and best known manufacturers of "Made In the USA" components for residential and light commercial reverse osmosis and filtration systems.

This acquisition allows TST Water to increase its distribution base, and expand its core of water filtration products, while providing additional work for TST's new U.S. based plastics molding division.

This new acquisition resulted in the relocation of all component manufacturing and assembly of Payne Industries components to Temecula, California. Payne Industries has become **Payne USA** and is operating as a separate company.

TST Water LLC is an internationally recognized manufacturer of quality products for the water filtration industry. The company specializes in point of use water filter products and systems.
