*Based on Manufacturer's Internal Test Data and Independent Lab Results

1 - WQA validated performance to NSF/ANSI Standard 42 protocols for chlorine reduction

2 - WQA validated performance to NSF/ANSI Standard 53 protocols for VOC reduction

3 - WQA validated performance to NSF/ANSI Standard 53 protocols for Cyst reduction

Actual performance capacity is dependant on several variables including system design, flow rates, water conditions, and other application specific conditions

Notes:

Minimum order value is \$100.00

Terms are cash in advance unless credit terms are established

*Performance claims are based on third party and manufacturer's internal test data.

Your results may vary due to flow rate, water quality, and application.

WARNING - Do not use with water that is microbiologically unsafe or of unknown quality without adequate disinfection before or after the system.
